

Serial No. 09/748,849  
Docket No. DP-696 US  
(MAR.051)

2

**AMENDMENTS TO THE SPECIFICATION:**

**Please amend the specification as follows:**

**At page 1, line 25 to page 2, line 3:**

At this first method in which the load of the receiving data is controlled, at the stage of designing the network (server/client) system, the number of clients connecting to the server sever is limited, or a memory temporarily storing communication data from the network to the server is provided. With this, the peak value of the received load at the server is made small. This method has been realized.
